

DISCOVER A GREAT TOOL

The Roxtec Transit Designer™ is developed for design departments using Roxtec sealing systems. It simplifies product selection as well as the process of designing, purchasing and installing transits. It drives efficiency and reduces the risk of mistakes in all phases!

ALWAYS AVAILABLE

The Roxtec Transit Designer™ does not require any installation on your computer. Your work is secure and accessible online from any computer, and the software is always updated.

Instant support worldwide

Through the chat function, you have access to the Roxtec cable and pipe transit design expertise. The support is always there to help you – directly and in your own language!

ROXTEC TRANSIT DESIGNER FEATURES

- Instant access to Roxtec experts via chat
- Quick and easy project team collaboration
- Copy and paste cable schedule into the software
- Browse Roxtec solutions based on given cable schedule
- Easy to dimension transits with spare capacity
- Visual drag and drop packing plan or automatic placement of cables/pipes
- Generating CAD drawings, Bill of Material, 3D models and installation instructions

ROXTEC TRANSIT DESIGNER™

SOFTWARE FOR EASY DESIGN OF CABLE AND PIPE TRANSITS

Available on
www.roxtec.com!

Roxtec® and Multidiameter® are registered trademarks of Roxtec in Sweden and/or other countries.

We Seal Your World™

IT'S AS EASY AS 1-2-3...

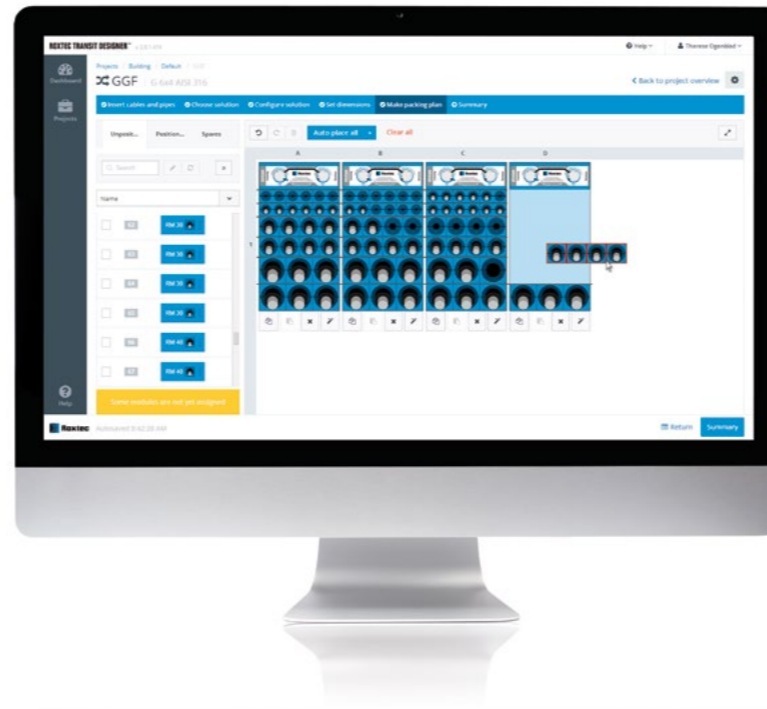

1. GO ONLINE

Register online and start using the Roxtec Transit Designer™. It is available on www.roxtec.com. You can share your work and set up collaboration with your project team.

2. SIMPLE INPUTS

Just copy and paste cable names, types and quantities as well as cable ID's into the software. It will then guide you through a simple process, including a filter for selecting the right solution according to needs and requirements. You only need to provide the preliminary size of the openings for cables and pipes. You can also share your cable schedule with Roxtec and let us take care of the entire process.

3. MANUFACTURER-APPROVED RESULTS

The software generates manufacturer-approved material lists and installation detail drawings (in dxf and pdf) for an efficient hand over to your procurement team and also to onsite installers and maintenance teams. Your drawings are ready and available right away, but you can still make changes. If you need help, just share the project and let us return the completed documents to you.
