

Double success for the growth machine Roxtec

Roxtec is both a “Super company” and a “Gazelle company”! According to the Swedish business magazine *Veckans Affärer* and the financial information provider PAR, Roxtec is number 17 on the list of the 434 super companies in Sweden.

To enter this prestigious list in the turbulent financial year of 2009, a company must be profitable, successful and present growth even during hard times.

Roxtec has also been selected as “Gazelle company” by the Swedish financial newspaper *Dagens Industri*. This year, 1 310 profitable companies throughout Sweden live up to the tough requirements for being listed among the country’s fastest growing companies.

“We are of course proud of being recognized as a successful company,” says Fredrik Hansson, CEO of Roxtec. “But we do not rest on any results from the past. In our team, we are always looking forward with our customers’ present and future needs in mind.”
