

## Roxtec extends its compact cable seal range

Cable seal provider Roxtec launches the Roxtec ComSeal™ 30/6 – a light-weight seal for power cables going into converters, generators and cabinets. It is designed for up to six power cables in the range 28-43 mm.

“The new Roxtec ComSeal™ 30/6 and the recently launched Roxtec ComSeal™ 15/3 make our compact seal product family complete. We can now help designers, manufacturers and contractors in many industries all over the world with flexible sealing solutions for cables from 3,5 mm all the way up to 43 mm,” says Robert Stubb, Head of Wind Power Segment at Roxtec.

### Light adaptable modules

The new seal contains the new Roxtec CM 50 sealing modules. These are lighter than the classic Roxtec modules for large cables, but nevertheless equipped with Multidiameter™, the Roxtec solution for adaptability to cables of varying sizes based on removable layers. “This unique solution simplifies installation – both in plants and on site,” says Robert Stubb. The seal makes it easy to use pre-terminated power cables, which is important when you want to speed up production and avoid the risk of errors. Another benefit is the ability to seal openings before transportation of equipment and thereby ensure transportation protection. After arrival on site, the seal can be opened for cable routing.

### Certified protection

The Roxtec ComSeal™ 30/6 is tested and approved for IP 55. It will also be released in an EMC version, approved for IP 54. The seal is supplied in kits and can be attached to the inside or outside of a structure for easy use in small spaces filled with equipment.

### **About Roxtec and Multidiameter™**

*Swedish Roxtec Group is the world-leading provider of flexible modular-based cable and pipe seals. The company's invention for adaptability to cables and pipes of different sizes is called Multidiameter™. The solution is based on sealing modules with removable rubber layers, which allows for a perfect sealing, regardless of the outside dimension of the cable or pipe. The technology simplifies design and engineering, speeds up the installation process and reduces the need for stock, material and logistics. It also provides built-in spare capacity for easy retrofit and future upgrades. Roxtec serves and supports customers in more than 70 markets through 14 subsidiaries and a network of distributors.*
