

REPORT

Samsung
LNGC Carriers

"The multidiameter technology saves us time in the installation and gives us very good flexibility whenever needed says Mr T.S. Kim, electrical installation department from Samsung Heavy Industries Co Ltd.

Mr T. S. Kim opens a hatch showing Roxtec installations for secure cable routing onboard LNGC Carriers.

Over the last few years Samsung has won a number of important vessel contracts. These include world leading owner companies within oil, gas and transportation, such as British Gas, Ras Gas, AP Moeller and BP Amco. In common for the vessels are clearly defined requirements in order to achieve a high level of safety.

Typical demands are resistance to dangers from a variety of hazards including fire, gas, water and explosion. On top of these demands are often put a desire for practical, flexible and economic solutions.

To meet these challenges Samsung has chosen Roxtec as supplier of its cable and pipe seals.

Since 15 years Roxtec is known as a world leading supplier and developer of high quality seals. In particular it applies to the high number

of certified solution for the offshore and shipping industries.

"The products from Roxtec gives us lower handling costs as few items are needed, and so are our stock costs", says Mr J.S. Choi, at Samsung's Purchasing department. "Also that we can use the same products both for cables and pipes gives us an advantage".

"The support from Roxtec is always professional with fast deliveries and service", he ends. ■

We Seal Your World

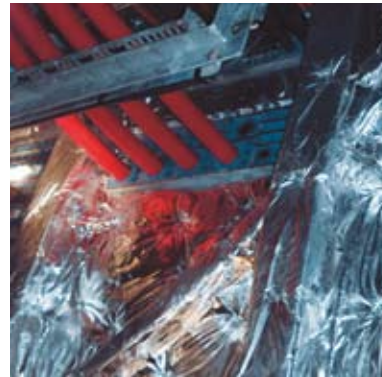

Facts

Example of multiple cable seals from Roxtec for safe routing in a marine LNG environment.

The cooperation between Mr. Ola Weidenberg of Roxtec and Mr. J. S. Choi of Samsung Heavy Industries Co Ltd enabled high quality solutions for the Projects.

One of the many typical Roxtec solutions is the S 6 opening, single or in combinations.

Description of the advantages of Roxtec products in this type of environment.

- Certification level: including gas tightness and other
- Flexibility
- Easy installation
- Future included: a benefit provided to the owner of the vessel

Products supplied to the project:

R 50	SLR 100
R 75	SLR 125
R 100	SLRS 50
R125	RM 20
RS 50	RM 30
S 6x1 BTB	RM 60
S 6x2 BTB	RM 90
S 4x1 BTB	Wedgekits
