Protecting life and assets

Benefit from the world's most flexible cable and pipe transits, wherever and whatever you operate. You can count on our expertise, from design to installation and throughout the lifecycle of your investment. Our passion is innovative sealing solutions, and our goal is to make our world a safer place. That is why we offer you a long-term partnership for efficiency and operational reliability.

The Roxtec sealing system

Our mechanical system is smart, safe and flexible. We provide rectangular, round and customized sealing solutions for one or multiple cables and pipes as well as pre-configured sealing kits. Thanks to the adaptability, you can always be sure to cover the sealing requirements with only a few components.

Frame

Module

Wedge

Stayplate

Lubricant

Multidiameter™ by Roxtec

Our invention with removable layers makes the seals adaptable.

It ensures a perfect fit to cables and pipes of many different sizes.

You get a strong, reliable barrier securing operational performance.

Certified protection

Roxtec cable and pipe transits protect people, ships, rigs and platforms all over the world against fire, gas, water and electromagnetic interference. Our seals ensure safe operations in harsh environments and are approved for use in hazardous locations.

Use the Roxtec sealing system to protect against multiple risks:

Fire

Stop A, H and jetfire. Prevent smoke from spreading.

Gas

Ensure complete tightness against air and gas pressure.

Water

Keep your unit safe and dry. Prevent humidity, water ingress and flooding.

Pressure

Protect against catastrophic as well as constant pressure.

Electromagnetic threats

Shield against EMI, EMP and lightning strike effects.

Particles

Take control of dirt, dust, salt and chemicals.

Blast

Protect against vibration, shock-waves and the risk of explosion.

**"We save a lot of time, up to 80%,
especially when changes are needed."**

Niels Ammundsen, Chief Process Officer at OMT, Denmark

Roxtec Transit Designer™

This free, online engineering tool simplifies product selection and secures the entire process of reducing risk. Save time by designing hundreds of cable and pipe transits in just a few minutes.

Simple user input:

Cable/pipe schedule or estimates
Sealing/certification requirements
Installation preferences
Material quality selection

Automatically generated output:

2D drawings in DXF and PDF
3D STEP
Bill of material in Excel
Installation instructions
Certificates

Sign up for Roxtec Transit Designer™ at roxtec.com/transitdesigner

Easy installation

Roxtec seals are quick and easy to install. You can open and reinstall them after design changes and save a lot of time by using the built-in spare capacity for upgrades with additional cables and pipes. You can always find best practice on roxtec.com/installation.

Support online and onsite

Installation videos

Watch and learn the safest sealing process.

Installation tools

Speed up daily work with our smart tools.

Installation training

Let your team learn our best tips and tricks.

Ensure safety and operational reliability

When striving to protect life and assets, you need correctly installed and fully functional sealing solutions. As sealing experts, we know how important cable and pipe transits are for your high safety standards. Roxtec transit safety services and Roxtec digital tools will help you take and maintain control of the installation quality throughout the entire lifecycle of your asset.

Services and digital tools

Transit quality assurance program

- Inspection of cable and pipe transits
- Verification of installation quality in new-build projects
- Experienced team of inspectors

Roxtec Transit Build™ software

- Control and documentation of installations
- Constantly updated for quality assurance
- Reports and results to hand over to owner

Roxtec S transit

Cable and pipe transit for welding to the structure.

The Roxtec S is a multi-cable and pipe transit available in different materials and with a single or various combinations of openings. The transit frame is produced in 10mm thick metal and is attached to the structure by welding. The sealing modules are adaptable to cables and pipes of different sizes, and can be used to build in spare capacity in the transit.

Benefits

- Fire rated
- Gas-tight
- Watertight
- Dust-tight
- Easy to maintain and inspect
- Provides built-in spare capacity

Roxtec SK transit

Transit with extra deep metal frame for welding to the structure.

The Roxtec SK is a cable and pipe transit with extended depth that is available in different materials and in a single or various combinations of openings. The metal transit frame is attached through welding and used for an angular attachment to accommodate stiff cables that do not pass in a straight angle through a deck or bulkhead. The seal also allows for an increased distance between the packing space and the structure. The standard sealing modules are adaptable to cables and pipes of different sizes, and can be used to build in spare capacity in the transit.

Roxtec R transit with SL R

Round transit for sealing of multiple cables and pipes in a limited area.

The Roxtec R with SL R is a cable and pipe transit with sleeve for round holes. The compression is integrated in the transit frame so it seals by expansion. The standard sealing modules are adaptable to cable and pipe sizes, and can also be used to build in spare capacity in the transit. The net on the backside protects during horizontal installations (not included in R 70 and R 75). The sleeve is welded to the structure.

GK Firestop sealing kit

Area efficient transit for cables, cable bundles or busbars.

The GK Firestop sealing kit is for use in sleeves in above waterline applications on ships and vessels. It combines cold smoke tightness with fire prevention as its integrated intumescent material expands to close the void in case of fire or a rise in temperature to over 150°C. The kit can be installed in a wide range of circular or oval sleeves, and it does not require any additional insulation for A-0 applications.

Roxtec RS PPS/S seal with SL

Light-weight plastic pipe seal for single-side installation.

The Roxtec RS PPS/S with SL is a seal for openings with plastic pipes in fire rated areas, such as steel decks and bulkheads. The seal ensures complete blocking of smoke, flames and water in case of fire and is approved for single-side installation. The transit is adaptable to pipes of different sizes through removable layers and includes a sleeve for welding to the structure. For plastic pipes up to 119mm.

Roxtec RS PPS/S F+WT seal with SL PPS

Plastic pipe seal for sustained water-tightness after fire.

The Roxtec RS PPS/S F+WT+SL PPS seal is a back-to-back arrangement of two seals for plastic pipe penetrations below waterline where there is demand for sustained watertightness after fire in accordance with SOLAS Ch. II-1 Reg. 13.2.3 (2009 issue) and IMO MSC/circ. 736 Par. 2.1. Each seal consists of two halves with removable layers for adaptability to pipes of different sizes. The transit includes a sleeve for welding to the structure.

Roxtec GHM transit for cabinets

Transit for high cable density and large cables.

The Roxtec GHM is a light-weight cable entry seal which is attached by bolting and includes a sealing strip to seal against the structure. The transit frame is available in different materials and in a single or various combinations of openings. The sealing modules are adaptable to cables and pipes of different sizes, and can be used to build in spare capacity in the transit.

Disclaimer

"The Roxtec cable entry sealing system ("the Roxtec system") is a modular-based system of sealing products consisting of different components. Each and every one of the components is necessary for the best performance of the Roxtec system. The Roxtec system has been certified to resist a number of different hazards. Any such certification, and the ability of the Roxtec system to resist such hazards, is dependent on all components that are installed as a part of the Roxtec system. Thus, the certification is not valid and does not apply unless all components installed as part of the Roxtec system are manufactured by or under license from Roxtec ("authorized manufacturer"). Roxtec gives no performance guarantee with respect to the Roxtec system, unless (I) all components installed as part of the Roxtec system are manufactured by an authorized manufacturer and (II) the purchaser is in compliance with (a), and (b), below.

(a) During storage, the Roxtec system or part thereof, shall be kept indoors in its original packaging at room temperature.

(b) Installation shall be carried out in accordance with Roxtec installation instructions in effect from time to time.

The product information provided by Roxtec does not release the purchaser of the Roxtec system, or part thereof, from the obligation to independently determine the suitability of the products for the intended process, installation and/or use.

Roxtec gives no guarantee for the Roxtec system or any part thereof and assumes no liability for any loss or damage whatsoever, whether direct, indirect, consequential, loss of profit or otherwise, occurred or caused by the Roxtec systems or installations containing components not manufactured by an authorized manufacturer and/or occurred or caused by the use of the Roxtec system in a manner or for an application other than for which the Roxtec system was designed or intended.

Roxtec expressly excludes any implied warranties of merchantability and fitness for a particular purpose and all other express or implied representations and warranties provided by statute or common law. User determines suitability of the Roxtec system for intended use and assumes all risk and liability in connection therewith. In no event shall Roxtec be liable for indirect, consequential, punitive, special, exemplary or incidental damages or losses.*

Protecting life and assets

Roxtec is the world leader within flexible cable and pipe transits. Since the start in Sweden in 1990 we have grown successfully to cover all continents. Our passion is innovative sealing solutions, and our goal is to make our world a safer place.

- Extensive R&D resources and advanced test facilities
- Inventor of Multidiameter™
- Customers in more than 80 markets
