

Global Environmental Policy

Roxtec International AB and Roxtec subsidiaries worldwide, have a positive environmental approach in development, sales, manufacturing and distribution of our sealing solutions for cable and pipe transits. Roxtec is working actively to reduce waste to landfill and carbon footprint from fossil fuels.

We achieve this through integration of the environmental work as follows:

- Identify, measure and follow up on the most important environmental issues of the business, which we can also change.
- Continuously improve our environment work and proactively avoid a negative impact on the environment.
- Conform to, or surpass, applicable legislation on environmental issues, instructions and other requirements.
- Keep our employees informed about the environment policy, train and motivate them to pursue their tasks in an environmentally responsible way.

Roxtec AB, April 2021

Magnus Holmberg
CEO
